Web Application Penetration Testing Checklist

https://www.hackers.co.id

Prepared by Tauhan Barkah

- [ ] Information Gathering
  - [ ] Identify web server and technologies used fingerprinting
  - [ ] Identifying Application Entrypoints
  - [ ] Mapping Application
  - [ ] Identify Application Architecture and Function Determination
  - [ ] Google Hacking
  - [ ] Spider/Crawl
  - [ ] Analyze Error Codes
  - [ ] Analyze Accessibility
  - [ ] Page Enumeration
  - [ ] Page Analysis
  - [ ] Application Discovery and Profiling
  - [ ] Application Entrypoints
  - [ ] Application Flows
  - [ ] Application Logic
  - [ ] Client Side Processing(Ajax/Flash)
  - [ ] Multiple Versions
  - [ ] Hidden Fields
  - [ ] Comments
  - [ ] Hidden Parameters/Fuzzing
  - [ ] Client Side Validation
  - [ ] Authentication Mechanism
  - [ ] Session Management
  - [ ] Access Control
  - [ ] Web Application Fingerprinting
  - [ ] Application Mapping
  - [ ] Application Discovery
  - [ ] Analysis
  - [ ] Application Entrypoints
  - [ ] Application Flows
  - [ ] Application Logic
  - [ ] Client Side Processing(Ajax/Flash)
  - [ ] Multiple Versions
  - [ ] Hidden Fields
  - [ ] Comments
  - [ ] Hidden Parameters/Fuzzing
  - [ ] Client Side Validation
  - [ ] Authentication Mechanism
  - [ ] Session Management
  - [ ] Access Control
